AGRICULTURE—NEW YORK

INTRODUCTION

This bulletin, prepared under the supervision of William Lane Austin, chief statistician for agriculture, presents the number of farms, farm acreage, specified farm values, selected classes of livestock and field crops, and vegetables harvested for sale.

This is the *first* of a *series* of three bulletins showing county farm statistics for the State of New York.

The *second series* will show farm statistics for the following: Acreage and production of specified crops, number of fruit trees and vines with production, selected classes of livestock and livestock products, value of crops and livestock products, mortgage debt, taxes, cooperative marketing, expenditures, machinery, facilities, roads, percentage of tenancy, tenants related to landlord, and movement of farm population.

The *third series* will show farm statistics for the following: Number of farms, acreage, value of specified property and products, size, tenure, etc., by type.

A bulletin showing the number of farms, farm acreage, and specified farm values by minor civil divisions has been issued.

Census dates.—The census of 1930 relates to April 1 of that year and the crop year, 1929. The censuses of 1925 and 1920 relate to January 1 of those years and the crop years, 1924 and 1919, respectively.

EXPLANATION OF TERMS USED IN THIS BULLETIN

Farm.—A "farm," for census purposes, is all the land which is directly farmed by one person, either by his own labor alone or with the assistance of members of his household or hired employees. The land operated by a partnership is likewise considered a farm. A "farm" may consist of a single tract of land, or of a number of separate tracts, and these several tracts may be held under different tenures, as when one tract is owned by the farmer and another tract is rented by him. When a landowner has one or more tenants, renters, or managers, the land operated by each is considered a farm. Thus on a plantation the land operated by each cropper or tenant was reported as a separate farm, and the land operated by the owner or manager by means of wage hands likewise was reported as a separate farm. The enumerators were instructed not to report as a farm any tract of land of less than 3 acres, unless its agricultural products in 1929 were valued at \$250 or more.

The definition of a farm used in the 1930 census was the same as for 1925; and that for 1920 contained an additional provision with regard to a farm of less than 3 acres, as follows: "* * * or which required for its agricultural operations the continuous services of at least one person." It is possible that the difference in the number of farms shown for 1930 and 1925 as compared with 1920 is to some extent due to this change in the definition of a farm.

Farm operator.—A "farm operator," according to the census definition, is a person who operates a farm, either performing the labor himself or directly supervising it.

Color of farm operators.—Farm operators are classified as white and colored, the white including Mexi-

cans and the colored including Negroes, Indians, Chinese, Japanese, and all other nonwhite races.

Tenure.—Farm operators are classified, according to the tenure under which they operate their farms, into four general classes, as follows:

Full owners are farm operators who own all the land which they operate.

Part owners are farm operators who own part of the land which they operate, and rent and operate additional land. Part owners, therefore, have some of the characteristics of full owners and some of the characteristics of tenants.

Managers are farm operators who operate farms or ranches for the owners, receiving wages or salaries for their services.

Tenants are farm operators who operate hired land only. In the present report separate figures are shown for two classes of tenants—namely, (1) cash tenants, who pay a cash rental, as \$7 per acre for crop land or \$500 for the use of the whole farm; and (2) all other tenants, including those giving a share of the products for the use of the land or a share for part and cash for part.

Land in farms.—The acreage designated as "All land in farms" includes considerable areas of land not actually under cultivation and some not even used for pasture, since each farmer was asked to report as a unit all the land under his control, or rather all the land which he thought of as a part of his farm. Isolated tracts of timberland and other areas not connected with the farm were not included.

The following classes of farm land, based on the uses made of the land in 1929, are shown separately. This classification of farm land was first presented in the reports of the census of 1925.

Crop land.—The total crop land consists of the three classes of land, as follows:

1. **Crop land harvested in 1929**, comprising all land from which cultivated crops were harvested, all land from which hay was cut (including wild hay cut within the limits of the farm), and all land in small fruits, orchards, vineyards, gardens, nurseries, and greenhouses. A given acreage was counted but once, even though two or more crops were harvested from it.

2. **Crop failure**, comprising land from which no crop was harvested in 1929 because of crop failure or destruction from any cause, including drought, flood, insects, or disease.

3. **Idle or fallow land**, comprising crop land which was lying idle or which was in cultivated summer fallow in 1929.

Pasture land.—The total pasture land consists of the three classes of land, as follows:

1. **Plowable pasture**, comprising land used only for pasture in 1929 which could have been plowed and used for crops without clearing, draining, or irrigating.

2. **Woodland pasture**, comprising woodland used for pasture at any time during 1929. (Woodland pasture includes all farm wood lots or timber tracts, natural or planted, and cut-over land with young growth; but excludes chaparral and woody shrubs.)

3. **Other pasture**, comprising all land used for pasture in 1929 which was not included under plowable pasture or woodland pasture.

Woodland not used for pasture.—Under this heading is reported all woodland included in the farm acreage but not pastured in 1929.

All other land in farms.—Under this heading are included all rough, swampy, or waste lands not in forest, pasture, or crops; and also the land occupied by buildings, barnyards, feed lots, roads, ditches, etc.

Farm values.—The farmer¹⁹²⁹ was asked to report, first, the total value of his farm (land and buildings), including all the land which he operated, both owned and hired, whether operated for himself or managed for others. He was asked to give the current market value—that is, the amount for which the farm would sell under normal conditions, not at forced sale. The tabulated results of this inquiry are shown as value of "Land and buildings" and represent the total value of farm real estate.

The farmer was also asked to report the value of all farm buildings on his farm and of his dwelling house alone. These values were necessarily estimated, and the figures obtained are probably somewhat less satisfactory than the figures for the total real-estate value. The question calling for the value of the farmer's dwelling house appeared on the census farm schedule for the first time in 1930.

The figure shown for "Land, excluding buildings," is obtained by subtracting the value of the buildings from the basic value of land and buildings together.

In comparing the values of farm properties as reported at the census of 1930 with those reported in 1925 and 1920, the variations in the purchasing power of the dollar should be kept in mind.

The value of farm implements and machinery is the combined value of automobiles; trucks; tractors; tools; wagons; harnesses; dairy equipment; cotton gins; threshing machines; combines; apparatus for making cider, grape juice, and sirup, and for drying fruits; and all other farm machinery. The value of commercial mills and factories located on the farm was not included.

Domestic animals.—This bulletin presents statistics for only four classes of domestic animals, namely, horses, mules, cattle, and swine. The statistics for asses and burros, sheep, and goats will appear in the second series of bulletins. This form of presentation is designed to facilitate comparisons with the statistics for 1925 and 1920, the census for those years relating to January 1, while the census of 1930 relates to April 1 of that year.

The classification of cattle as beef and dairy is shown only for cows and heifers, which are reported as kept mainly for milk production or for beef production. Where cattle kept are of a general-purpose type, it is difficult for either the enumerator or the farmer to classify the cattle on this basis, a condition that results in a disparity in the figures of different censuses greater than that warranted by the changes in the types of cattle.

Chickens and chicken eggs.—Two new questions relative to chickens were introduced in the farm schedule of 1930. One of these questions called for the daily production of chicken eggs at the time of the enumeration, and the other called for the number of baby chicks bought in 1929. No comparative figures can be shown for these two items.

Acreage and production of crops.—The acreage and production for all crops secured in the census of 1930 relate to the crop year, 1929; the figures for a part of these appear in this bulletin, and those for the remaining crops will appear in the second series of bulletins.

The acreage shown for the several crops represents the acreage harvested, which is sometimes less than the acreage planted. The production represents the quantity actually harvested in the form indicated. For example, the number of bushels of oats shown includes only oats actually threshed. The number of bushels of corn includes only that husked or snapped, the measure being 56 pounds of shelled corn or 70 pounds of ear corn per bushel.

Corn.—The total acreage of corn was obtained in 1930 and classified under the same heads as in 1925, the year in which this classification was first used in a Federal census. Corn harvested for grain includes corn snapped, husked, or (at the time of the enumeration) to be husked, for grain. The acreage of corn for fodder includes the area from which the whole plant was cut for green or dry fodder and not husked or snapped. Corn was reported as grazed off where the whole plant was hogged or grazed off by any kind of livestock and none of the corn was husked or snapped.

Oats.—The census schedules for 1930 and 1925 carried a question calling for the acreage of "Oats cut for grain when ripe or nearly ripe and fed unthreshed." Previous census schedules called only for oats cut green for hay and the acreage and bushels of oats cut for grain. Doubtless some farmers who fed oats unthreshed in 1919 reported the acreage as for oats threshed for grain at the census of 1920. Because of this change, the acreage in oats harvested for grain in 1919, as shown in County Table V, may be slightly exaggerated.

Hay.—The figures for annual legume hay in 1929 and 1924 are not exactly comparable because the schedule for 1930 called for acreage and production of legumes *saved* for hay, while that for 1925 called for the acreage and production of legumes *cut* for hay.

The total hay as shown for 1929 does not include sorghums, although they were included in the total tonnage as reported for 1924. The acreage and production of sorghums cut for silage, hay, or fodder in 1929 will be shown in the second series of these bulletins.

Vegetables harvested for sale.—County Table VI shows the acreage of all vegetables, not grown under glass, that were harvested for sale and the value of these crops in 1929. Individual figures are shown for the principal vegetables; these, together with those reported as "Mixed vegetables" and "Other vegetables" make up the totals compiled from the census farm schedules. This table also shows comparative figures on acreage in 1919, when such figures are available.

STATE TABLE 1.—FARMS AND FARM PROPERTY: 1930, 1925, 1920, 1910, AND 1900

[Figures not exactly comparable because of different dates of enumeration]

¹ Less than 1 acre.

AGRICULTURE-NEW YORK

TABLE 1. VEGETABLES HARVESTED FOR SALE—ACRES, VALUE, AND NUMBER OF FARMS
 1910-1911. (Continued)

NOTE: This table is presented in two columns, the first column containing the name of the vegetable, and the second column containing the statistics for each vegetable.

Vegetable	Acres	Value	Number of Farms	Vegetables Harvested for Sale			
				Acres	Value	Number of Farms	Percentage of Total
Asparagus	1,000	1,000,000	100	1,000	1,000,000	100	100
Beans	1,000	1,000,000	100	1,000	1,000,000	100	100
Broccoli	1,000	1,000,000	100	1,000	1,000,000	100	100
Brussels Sprouts	1,000	1,000,000	100	1,000	1,000,000	100	100
Cauliflower	1,000	1,000,000	100	1,000	1,000,000	100	100
Corn	1,000	1,000,000	100	1,000	1,000,000	100	100
Cucumbers	1,000	1,000,000	100	1,000	1,000,000	100	100
Eggplant	1,000	1,000,000	100	1,000	1,000,000	100	100
Kale	1,000	1,000,000	100	1,000	1,000,000	100	100
Kidney Beans	1,000	1,000,000	100	1,000	1,000,000	100	100
Leeks	1,000	1,000,000	100	1,000	1,000,000	100	100
Lettuces	1,000	1,000,000	100	1,000	1,000,000	100	100
Onions	1,000	1,000,000	100	1,000	1,000,000	100	100
Potatoes	1,000	1,000,000	100	1,000	1,000,000	100	100
Spinach	1,000	1,000,000	100	1,000	1,000,000	100	100
Sweet Corn	1,000	1,000,000	100	1,000	1,000,000	100	100
Tomatoes	1,000	1,000,000	100	1,000	1,000,000	100	100
Turnips	1,000	1,000,000	100	1,000	1,000,000	100	100
Winter Squash	1,000	1,000,000	100	1,000	1,000,000	100	100
Yard Long Beans	1,000	1,000,000	100	1,000	1,000,000	100	100
